Smart Academy

Course Catalogue 2026/2027

SAMPLE CATALOGUE FOR TESTING THE REX AI IMPORT - fictional courses, prices and dates.

Fees are in Egyptian pounds (EGP). Each course block below follows the import format (Label: value; lists separated by semicolons).

AI-301 — Deep Learning with PyTorch

Course ID: AI-301

Title: Deep Learning with PyTorch

Department: AI

Level: Advanced

Target Audience: Engineers and data scientists who already know machine learning and want to build neural networks

Industry: Technology; Healthcare; Telecom

Duration (hours): 48

Duration (weeks): 8

Formats: Online live; Hybrid

Language: English

Description: Train and deploy modern neural networks with PyTorch: CNNs, graph neural networks, transformers and generative models, with weekly labs on real datasets and a deployed capstone.

Learning Outcomes: Train and debug deep networks in PyTorch; Build CNNs for images and GNNs for graph data; Implement a transformer from scratch; Fine-tune a pretrained model for a business task

Modules: Neural network training; Convolutional networks; Graph neural networks; Transformers and attention; Generative models; Scaling and deployment; Capstone

Prerequisites: Python programming; Machine learning basics; Linear algebra

Career Opportunities: Deep learning engineer; Computer vision engineer; AI research engineer

Tags: ai; machine learning; deep learning; pytorch; neural networks; transformers

Certificate: Academy certificate of completion

Instructors: INS-01

Country: Egypt; Saudi Arabia

Fee (EGP): 16,500

Installments: Yes

Schedule: 2026-12-06 | Online live | Sun, Tue | 19:00-22:00 | 18 seats

Schedule: 2027-01-17 | Hybrid | Sat | 10:00-16:00 | 12 seats

DS-201 — Machine Learning Engineering and MLOps

Course ID: DS-201

Title: Machine Learning Engineering and MLOps

Department: Data

Level: Intermediate

Target Audience: Data analysts and developers moving into production machine learning

Industry: Technology; Banking; E-commerce

Duration (hours): 40

Duration (weeks): 8

Formats: Online live

Language: English; Arabic

Description: Take machine learning models from notebook to production: feature pipelines, experiment tracking, model serving with Docker and monitoring for data drift.

Learning Outcomes: Build reproducible training pipelines; Track experiments and version models; Serve models behind an API with Docker; Monitor models in production

Modules: ML project workflow; Feature engineering; Experiment tracking; Model serving; Docker for ML; Monitoring and drift; Capstone

Prerequisites: Python programming; Basic statistics

Career Opportunities: Machine learning engineer; MLOps engineer; Data scientist

Tags: machine learning; data science; mlops; python; docker

Certificate: Academy certificate of completion

Instructors: INS-01; INS-06

Country: Egypt

Fee (EGP): 13,000

Installments: Yes

Schedule: 2026-11-29 | Online live | Mon, Wed | 19:00-22:00 | 20 seats

SW-301 — Mobile App Development with React Native

Course ID: SW-301

Title: Mobile App Development with React Native

Department: Software

Level: Intermediate

Target Audience: Web developers who want to build Android and iOS apps from one codebase

Industry: Technology; Retail; Media

Duration (hours): 45

Duration (weeks): 9

Formats: Hybrid; Onsite

Language: Arabic; English

Description: Build and publish cross-platform mobile apps with React Native and Expo: navigation, state management, REST APIs, offline storage and store release.

Learning Outcomes: Build cross-platform screens with React Native; Manage app state and navigation; Connect apps to REST APIs; Publish an app to Google Play and the App Store

Modules: React refresher; React Native basics; Navigation; State management; APIs and authentication; Offline storage; Testing and release

Prerequisites: JavaScript; React basics

Career Opportunities: Mobile developer; React Native developer; Front-end developer

Tags: programming; javascript; react; mobile development; react native

Certificate: Academy certificate of completion

Instructors: INS-04

Country: Egypt; Saudi Arabia

Fee (EGP): 12,000

Installments: Yes

Schedule: 2026-12-13 | Hybrid | Sat, Mon | 18:00-21:00 | 16 seats

CY-201 — Ethical Hacking and Penetration Testing

Course ID: CY-201

Title: Ethical Hacking and Penetration Testing

Department: Cybersecurity

Level: Intermediate

Target Audience: IT and network professionals preparing for offensive security roles

Industry: Banking; Government; Telecom

Duration (hours): 42

Duration (weeks): 7

Formats: Onsite; Hybrid

Language: English

Description: Learn how attackers think and how to test systems legally: reconnaissance, web and network exploitation, privilege escalation and professional pentest reporting in a lab environment.

Learning Outcomes: Plan a penetration test within legal scope; Find and exploit common web vulnerabilities; Escalate privileges on Linux and Windows; Write a professional pentest report

Modules: Ethics and scoping; Reconnaissance; Web application attacks; Network attacks; Privilege escalation; Reporting

Prerequisites: Networking fundamentals; Linux command line

Career Opportunities: Penetration tester; Security analyst; Red team engineer

Tags: cybersecurity; security; penetration testing; ethical hacking

Certificate: Academy certificate of completion

Instructors: INS-07

Country: Egypt; Saudi Arabia

Fee (EGP): 14,500

Installments: No

Schedule: 2027-01-10 | Onsite | Sun, Thu | 17:00-21:00 | 14 seats

BU-301 — Data-Driven Digital Marketing

Course ID: BU-301

Title: Data-Driven Digital Marketing

Department: Business

Level: Beginner

Target Audience: Marketers, business owners and graduates starting in digital marketing

Industry: Retail; E-commerce; Media

Duration (hours): 24

Duration (weeks): 4

Formats: Online live

Language: Arabic

Description: Plan, run and measure digital campaigns: SEO, paid social, email marketing and analytics dashboards to decide where to spend the budget.

Learning Outcomes: Build a digital marketing plan; Run paid social and search campaigns; Measure results with analytics; Report campaign performance

Modules: Marketing strategy; SEO basics; Paid social ads; Email marketing; Analytics and dashboards

Prerequisites: None

Career Opportunities: Digital marketing specialist; Social media manager; Marketing analyst

Tags: marketing; digital marketing; seo; social media; ads

Certificate: Academy certificate of completion

Instructors: INS-09

Country: Egypt

Fee (EGP): 6,500

Installments: Yes

Schedule: 2026-12-02 | Online live | Wed | 19:00-22:00 | 30 seats
